

Faktor 3 ApS
 Hejrevej 39, 1
 2400 Copenhagen NV
 DENMARK
 Phone: +45 88200220

Faktor 3 is a young Danish Design and Development Company with the competence of combining the three key factors: Design, Technology and Sustainability. Our strength lies in the combination of our competences and our ability to work interdisciplinary. We think out of the box and participate in innovative and creative projects aimed for a greener future, mainly by integrating solar cells and other energy-efficient technologies such as LEDs in our products. When regarding a new product we look at the whole system and seek to optimize every part. Therefore we possess deep knowledge about the technology of solar cells, LEDs, the energy distribution of the sun and how to integrate the technology in the best way in a beautiful and functional design.

- Sector:** Business
- Type:** Private limited company
- Activities:** Manufacturing
Consulting
Research & development
Supplier
- Technology areas:** Energy Efficiency
Renewable Energy
Environmental Technologies
- Technologies:** Lighting
Low-Energy Buildings
Photovoltaics
Process Optimization
