

SOLVEI® connecting the sun

SOLVEI® is a unique sun power management unit that fits into all solar-powered products. SOLVEI® is an intelligent software system that can control LED light, sun shading, monitors, info stands, security and surveillance equipment, motors, sensors and much more.

SOLVEI® is a high quality system that is small and thus easily connected to a solar cell, battery and output system. SOLVEI® is designed to manage systems of 5m² solar cells and below. SOLVEI® is dimensioned for Northern Europe and the patent pending intelligent software ensures storage of solar energy and optimizes the harvested solar energy with up to 50% and extends battery lifetime.

LYSSPOR®
Light unit

Tele communication

Sun shading

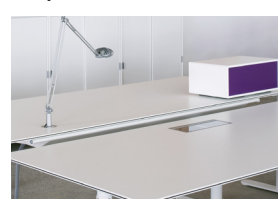

SOLVEI®

Tele medicine

Bicycle rack

Height adjustable table

SOLVEI® integrated in a variety of solar-powered products ranging from city inventory to small medico products.

SOLVEI® controls the indoor climate in residential and office areas according to the travelling of the sun or the users' needs.
